Two-node periodic relative-position fixes | SYNTHETIC DATA

60 s, 100 Hz, 2 s fixes at NONZERO velocity; 5 mm per-axis observation noise; seed=0

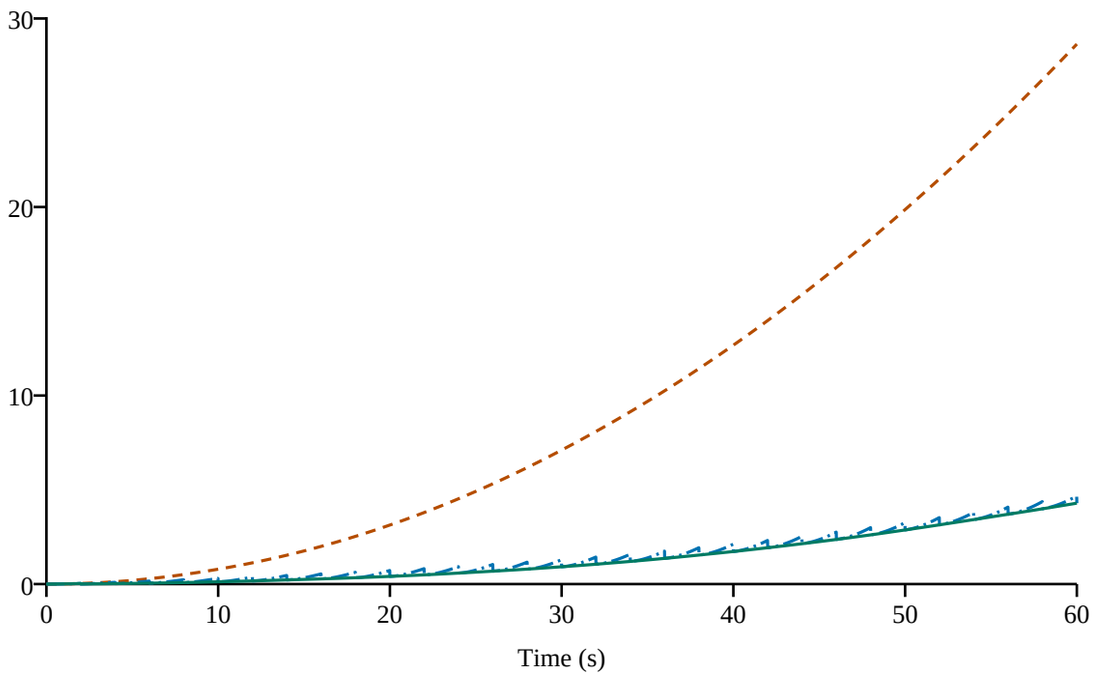

Relative error (m), full scale

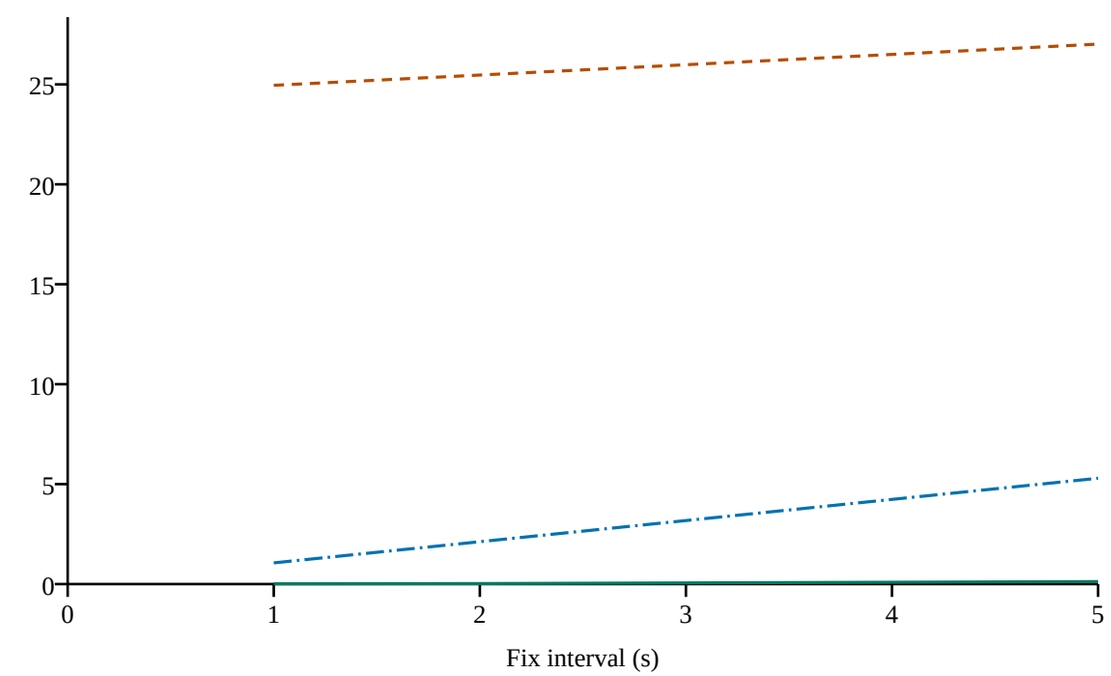

Filtered relative error ONLY (m), expanded scale

Absolute node position RMS error (m)

Pre-fix relative RMSE (m): median across 10 seeds

No fixes

Position reset only

Position + velocity/bias filter
